

2 Sailboat Line Hangers Product Brief

2P009_v1_01

Product Overview

These Sailboat Line Hangers are marine-grade organizational solutions designed to keep halyards, sheets, and other running rigging neat, accessible, and tangle-free when not in use. Constructed from corrosion-resistant materials, this essential deck hardware helps maintain a clean cockpit while protecting lines from UV damage and wear.

Key Features

- **Marine-Grade Construction:** UV-resistant ABS body with stainless steel mounting hardware
- **Universal Fit:** Mounts to stanchions, rails, or flat surfaces on boats 20-70 feet. 2 hangers in one pack.
- **Capacity:** Holds a coiled line bundle with bundle diameter up to 12cm
- **Low Profile:** Compact 50mm x 40mm footprint minimizes deck obstruction

Specifications

- **Dimensions:** 50mm L x 40mm W x 25mm H
- **Weight:** 1.1 oz
- **Material:** UV-stabilized ABS plastic
- **Hardware:** 304 stainless steel screws included
- **Load Capacity:** 10 lbs
- **Color Options:** black body with black or royal blue elastic line

Installation Instructions

Tools Required

- 5/16" drill bit
- Power drill
- Phillips head screwdriver
- Pencil or marker
- marine grade silicone sealant
- Masking tape (optional, to protect gelcoat)

Installation Steps (repeat for each line hanger)

Step 1: Select Mounting Location Choose a location within easy reach of the cockpit where lines are frequently used. Ensure there's adequate clearance (minimum 8" above) for hanging coiled lines. Common locations include:

- Aft stanchion bases
- Cockpit coaming
- Cabin house sides near winches

Step 2: Mark Hole Position Hold the line hanger against the mounting surface and use a pencil to mark the mounting hole position through the housing.

Step 3: Apply Protective Tape (Optional) Place masking tape over the marked area to prevent gelcoat chipping during drilling.

Step 4: Drill Mounting Hole Using a 5/16" drill bit, drill straight through the marked locations. Apply steady, moderate pressure and keep the drill perpendicular to the surface. If drilling through fiberglass, use a slow drill speed to prevent cracking.

Step 5: Secure Line Hanger Apply marine grade silicone sealant to the drilled hole and in the pre-drilled hole of the line hanger. Insert the stainless steel screw through the line hanger base and into the mounting surface. Use a screwdriver to snug it firmly. Do not overtighten, as this may crack the plastic housing or gelcoat.

Step 6: Test Installation Load the hanger with coiled lines and gently pull downward to verify secure mounting.

Use Cases

- Organizing halyards after raising sails
- Storing spare sheets and docking lines
- Keeping fender lines accessible but tidy
- Hanging safety equipment tethers

Package Contents

- 2x Line Hangers
- 2x stainless steel mounting screws (plus 1 extra)
- Installation instructions

Warranty

Backed by a 90day limited warranty against defects in materials and workmanship under normal marine use.
